

## BSN Nursing Sophomore Summer Accelerated Program

**Application to continue in the School of Nursing program is a separate application than from the university.** This application allows the student to be accepted into Gate 1 (continuance in the School of Nursing curriculum). The Sophomore Summer Accelerated program is designed for students who already have a degree or transfer students who have completed 2 years of college level work. Fifty students are selected for this summer program and the 4 sophomore level nursing classes are taught as intensives over an 8 week time frame typically beginning the week following graduation at Liberty University. Students who are successful in these classes will enter into the junior year in the fall semester. Students can also apply to take Senior Nursing classes as intensive the summer between junior and senior year. Those students will finish senior year in the fall and graduate in December. Please visit [www.liberty.edu/nursing](http://www.liberty.edu/nursing) for more information.

- Minimum cumulative 3.25 GPA
- 55 transferable credits to the Nursing Degree Completion Plan
