

Important!

Information about Detergent Usage.

- Add a low-sudsing, high-efficiency detergent made for front-loading washers to this dispenser chamber. Look for this symbol on the detergent label.

- Use the cap or scoop provided by the detergent manufacturer to measure the amount recommended: approximately 1/3 cup powder or 1/2 cup liquid.
- Use of a regular detergent is not recommended. It will cause oversudsing, but will also reduce cleaning.
