Random Block of Questions for Online Testing

Below you will find the steps that need to be taken in order make sure that each student in your class sees a different set of questions on a single test.

1. From the Control Panel of your course go to the Test Manager.
2. Add a new test or modify an existing one.
3. When choosing a question type, choose the Random Block option.
4. Choose any test or pool you have previously created.
5. Put a check in the box next to the type of questions you want to include in the test.
6. Choose the number of questions you want to import.
7. Assign a point value to the questions.
8. Click Import.
9. If you are modifying an existing test, the random block will appear at the bottom.
10. Click Ok at the bottom and deploy the test to the content area for student to take.

If you have any questions please address those to mnheidem@liberty.edu.
