MARRIAGE AND FAMILY COUNSELING I

**COURSE DESCRIPTION**

This course considers the dynamics of marriage and family relationships from a systems perspective. The emphasis is on understanding family and other systems theories, the structure and function of marriage, various aspects of the marital relationship and family systems, and models of family and systemic interventions. Considerations from a historical perspective are presented along with current developments within marriage and family systemic models.

**RATIONALE**

This course is designed to cover the numerous and varied marriage and family theories as well as the history of marriage and family therapy. The information in this course is designed to equip counselor trainees for practice and to successfully complete the licensure exam.

COUN 601 is a required course in the 48- and 60-hour licensure programs and is intended to introduce the student to the concept and philosophy of marriage and family therapy. The student will be required to understand the systems philosophy and six major theoretical frameworks within the marriage and family therapy field. The student will understand such core content areas as: marriage and family history, key theoretical figures, ethics and legal matters, counseling issues, some techniques, current trends, and future themes. This is the first marriage and family course; thus, it is designed to teach foundational materials necessary to pass state licensure examinations. For a more in-depth and deeper level of understanding, demonstration, and skill development, the COUN 602 course may be taken when offered.
