COURSE SYLLABUS

MILT 675
ADVANCED MILITARY MENTAL & BEHAVIORAL HEALTH

COURSE DESCRIPTION
This course will cover advanced assessment and treatment of military mental and behavioral health issues, including Posttraumatic Stress Disorder (PTSD), Traumatic Brain Injury (TBI), and related stressors. Topics to be covered include “best practices” for treating depression, suicidal ideation, addictions, and other prevalent mental and behavioral disorders.

RATIONALE
The stressors faced by members of the military rank among the most intense faced by any group. Military combat exposure is ranked as the most likely occurrence to cause Post Traumatic Stress Disorder (PTSD), and it provides an environment wherein Traumatic Brain Injury (TBI) is always a possibility. The Pentagon recently stated that at least 30% of returning troops from Iraq and Afghanistan suffer from Combat-related PTSD. Those working with our military will face the challenge of counseling and assisting individuals and families affected by PTSD, TBI, and additional challenges at an ever-increasing rate. Those who put their lives on the line are worthy of the best help available.
