

Lakeside School

Lakeside School is a therapeutic that offers students the opportunity to experience academic, emotional, social, and behavioral success. Lakeside School provides students a therapeutic learning experience with an approach that balances both support and nurture. Small classes, intensive counseling, individualized planning and partnerships with parents are key elements of each. Interns work under the supervision of one of our clinical school counselors as part of the Lakeside School clinical team. Interns get experience in individual counseling, psycho-educational groups, Neurosequential Model of Therapeutics regulation activities, and short-term problem solving work with students.

Prospective interns should contact Eric Smith with their resume via email to schedule an interview. We are typically begin interviewing interns in March for the following academic year. Interns are required to work a minimum of 2 full days (8am-4pm) for a full year, or a minimum of 4 full days for one semester.
