

## Sample References in AMA-11 Format

The reference entries below are arranged by resource type solely for the purpose of helping students see the elements and order for specific types of resources (delineated to the left margin). A class paper would obviously not have a table or columns in the reference list; nor would it have coloring. Rather, the reference list would appear as the right-side of the table below, arranged in the order that the resources are cited in the body of the paper.
