Bloodborne and Airborne Pathogens Training Online

[Download Course Description >](#)

There's very little you want to leave to chance when it comes to the highly-sensitive areas of exposure to blood and other infectious materials. The lives and health of your employees are at risk without the best and most comprehensive training available.

This convenient program is taught in a clear, easy-to-understand format. Courses include features that are proven to enhance retention, such as animation, video, interactive user exercises and real-world simulations.

NSC Bloodborne & Airborne Pathogens Online exceeds the OSHA Bloodborne Pathogens Standard by including airborne pathogens to help workers protect themselves against illnesses that can result in debilitating disease and can be completed in about two hours. Participants who successfully complete the online training will receive a nationally recognized course completion card.

Bloodborne pathogens training also is available in a classroom setting, or you can purchase packaged training.

Participants will learn:

- The fundamentals of bloodborne pathogens
- Essential information on hepatitis viruses and HIV
- How to prevent infection from bloodborne pathogens
