PRECEPTOR EVALUATION FORM

Preceptor Evaluation
Thank you for agreeing to supervise this student for the final course in his/her Master of Public Health degree program. Each student is expected to contribute at least 120 hours to complete a public health project or research project under the supervision of a preceptor. The practicum is intended as an opportunity for the student to demonstrate sufficiency in the field of public health. Much of this time will be spent in direct efforts to accumulate research data or to implement a public health project. The remainder of the time is to be spent analyzing and documenting the work. It is our hope that the student will function professionally with little need for direction from the preceptor. However, accountability to a preceptor serves to elevate the level of field work to the highest level and in addition, prepares the student to enter the professional ranks after graduation. We depend on the advising preceptor to help the student remain on task and committed, to complete the project in a timely manner. The preceptor evaluation gives us insight about the student’s professionalism and commitment to public health. It represents 15 percent of the student’s final grade. Please return the completed evaluation document to Liberty University prior to the final module/week of the student term.

Liberty University Master of Public Health Program

Practicum Evaluation for: ________________________________
Preceptor: __________________________________________
Date: ________________________________________________

Please evaluate the student on the following criteria.
