

Completed Online Health Form Required Before You Travel

You must complete the Health Form online prior to your arrival at Liberty University. This form must show that you have all the required immunizations and tests. Dates of all tests and immunizations are required on the Health Form.

If your Health Form is not completed within 30 days before the beginning of the semester or if you have not had all required immunizations or tests, the following may take place:

- Your SEVIS I-20 may be cancelled. You may not be able to enter the U.S. without this form or you may be required to return to your home country after arriving at a U.S. port of entry.
- In order to be picked up by Liberty University at the air, bus or train terminal, you will need to submit a completed online health form.
- You may not be allowed to move into campus housing. You will need to stay in a hotel until all immunizations and tests are completed.
- You will be required to visit a medical doctor and receive all immunizations and tests at your own expense. Please note that immunizations and medical tests in the U.S. are generally much more expensive than immunizations in your home country. Student health insurance will not pay for the required immunizations or tests.

Please bring copies of your medical records with you when you travel to the U.S.

IMPORTANT: Your tuberculosis test must be completed within six months of your travel to the U.S. Results of the TB test must be signed by a medical doctor. Students from India must also provide proof of a Polio vaccine.

This health form is subject to change. We will notify you through email of any changes so please check your email frequently.

Before you travel, you must complete the Health Form online:

1. Log onto your ASIST account.
2. Click on "General Information" tab.
3. Click on "Student Health Form."
