

Before students begin this program, they must hold a current initial teaching license with either an Algebra I add-on or a Secondary (Grades 6-12) Mathematics endorsement and two years of experience under that license in which the teaching of mathematics was an important responsibility. If the initial teaching license is not from Virginia, a Virginia initial teaching license must be obtained during the program. After completion of the required program coursework (including internship), the passing of licensure tests, and a third year of experience, the graduate of this program would be eligible for adding the VA state licensure endorsement.
